

INTEGRATED USE CASE, SYSTEM FEATURES, MOCK UPS AND WIREFRAMES

General

The Digital Solution implemented through Tender: _____, is a dynamic platform in a sense that it has design features that its design accommodates an interactive user experience and interfaces may be updated through CMS.

The above Tender including any documentation or designs submitted by the Contractor to the Client does not include integration of the digital solution with functional organizational processes, adherence to procedures or any other integration that may b required shall be considered at the Clients discretion.

This integrated document highlights summarizes key design specifications – requirements for the Tender and interpretation purposes.

1. Major User Types ([B]-> [IE] <-)

User Classification by designated function based on requirements. The system shall have multiple users; Primarily the logic puts emphasis on the Applicant and Finance User, as interoperability between these primary User types is major priority and objective in the organization. Other Users defined on the diagram as documented as Secondary or Support Users. Digital Solution shall provision for plugins – including an AI Chatbot Utility

2. Web Portal/ Interface/ Online Platform

Digital Solution interfacing – integrating various User Type Classifications – enabling multiple interactive – dynamic and static functionality and load management. Access Control specified for different users (Internal and external) enabled with appropriate authentication – secured. Integrates a plugin – ad on Chat Bot to assist users navigate the Client Website and its various features.

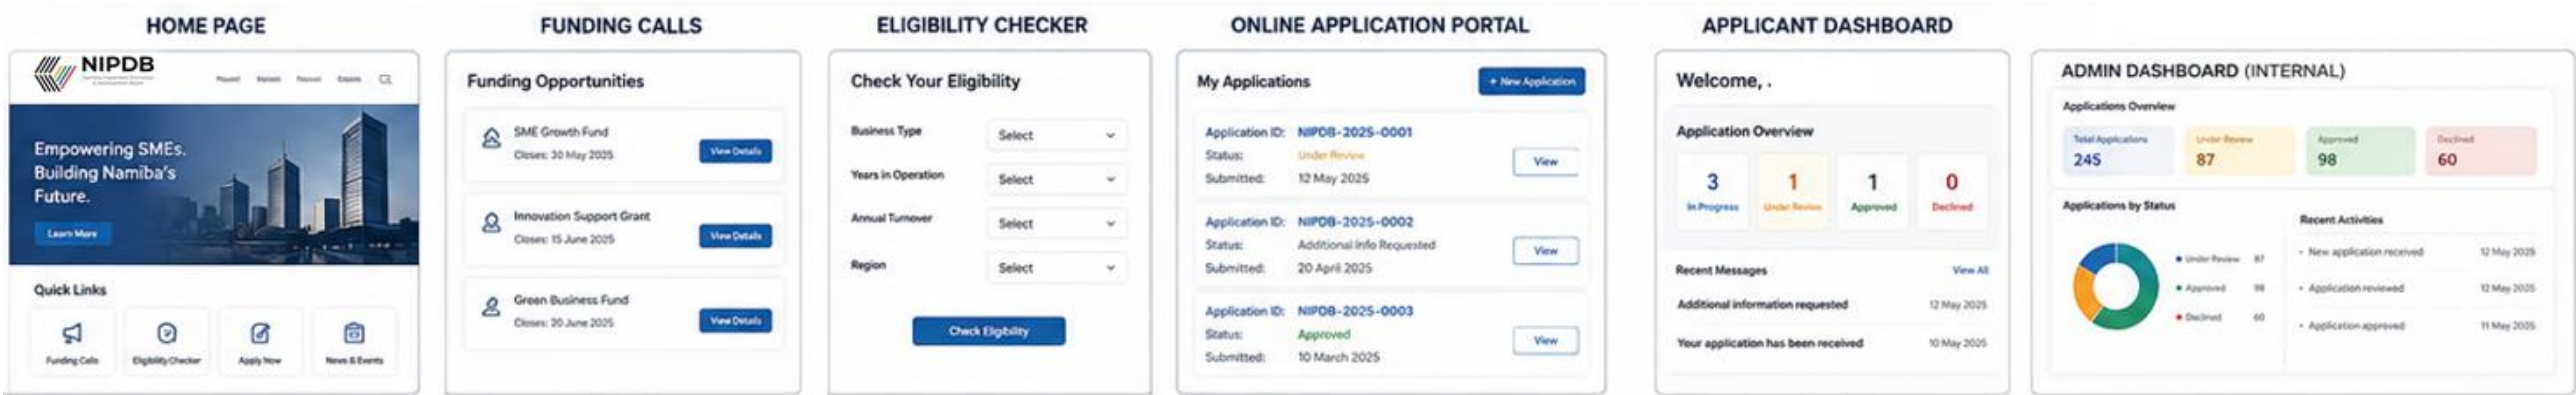

3. Accessibility

Digital Solution supports access primarily through a PC or mobile phone – tablet. Design Specifications for website are structured to meet Client needs for enabling access in order to reach people in different geographic locations. This allows the Client to bring its services closer to the target community or users while making provision for more convenient Administration through Dashboards.

4. SYSTEM FEATURES

For the purpose of documenting User Mock Ups and Wireframes. Content Management System using WordPress integrated into Digital Solution. User Classification by designated function based on requirements. The system shall have multiple layered functionality incorporated in the design and development. Customized Dashboards configured with preset and updateable metrics are an integral component to the Digital Solution achieving the desired organizational objectives, noted in reference of the primary requirements for the solution.

NIPDB – PROSME FUND PLATFORM – HIGH FIDELITY MOCKUP OPTIONS

These mockups help advise the feel (look and style) of the User Interface (UI) and User Experience (UX) when the prototype is developed.

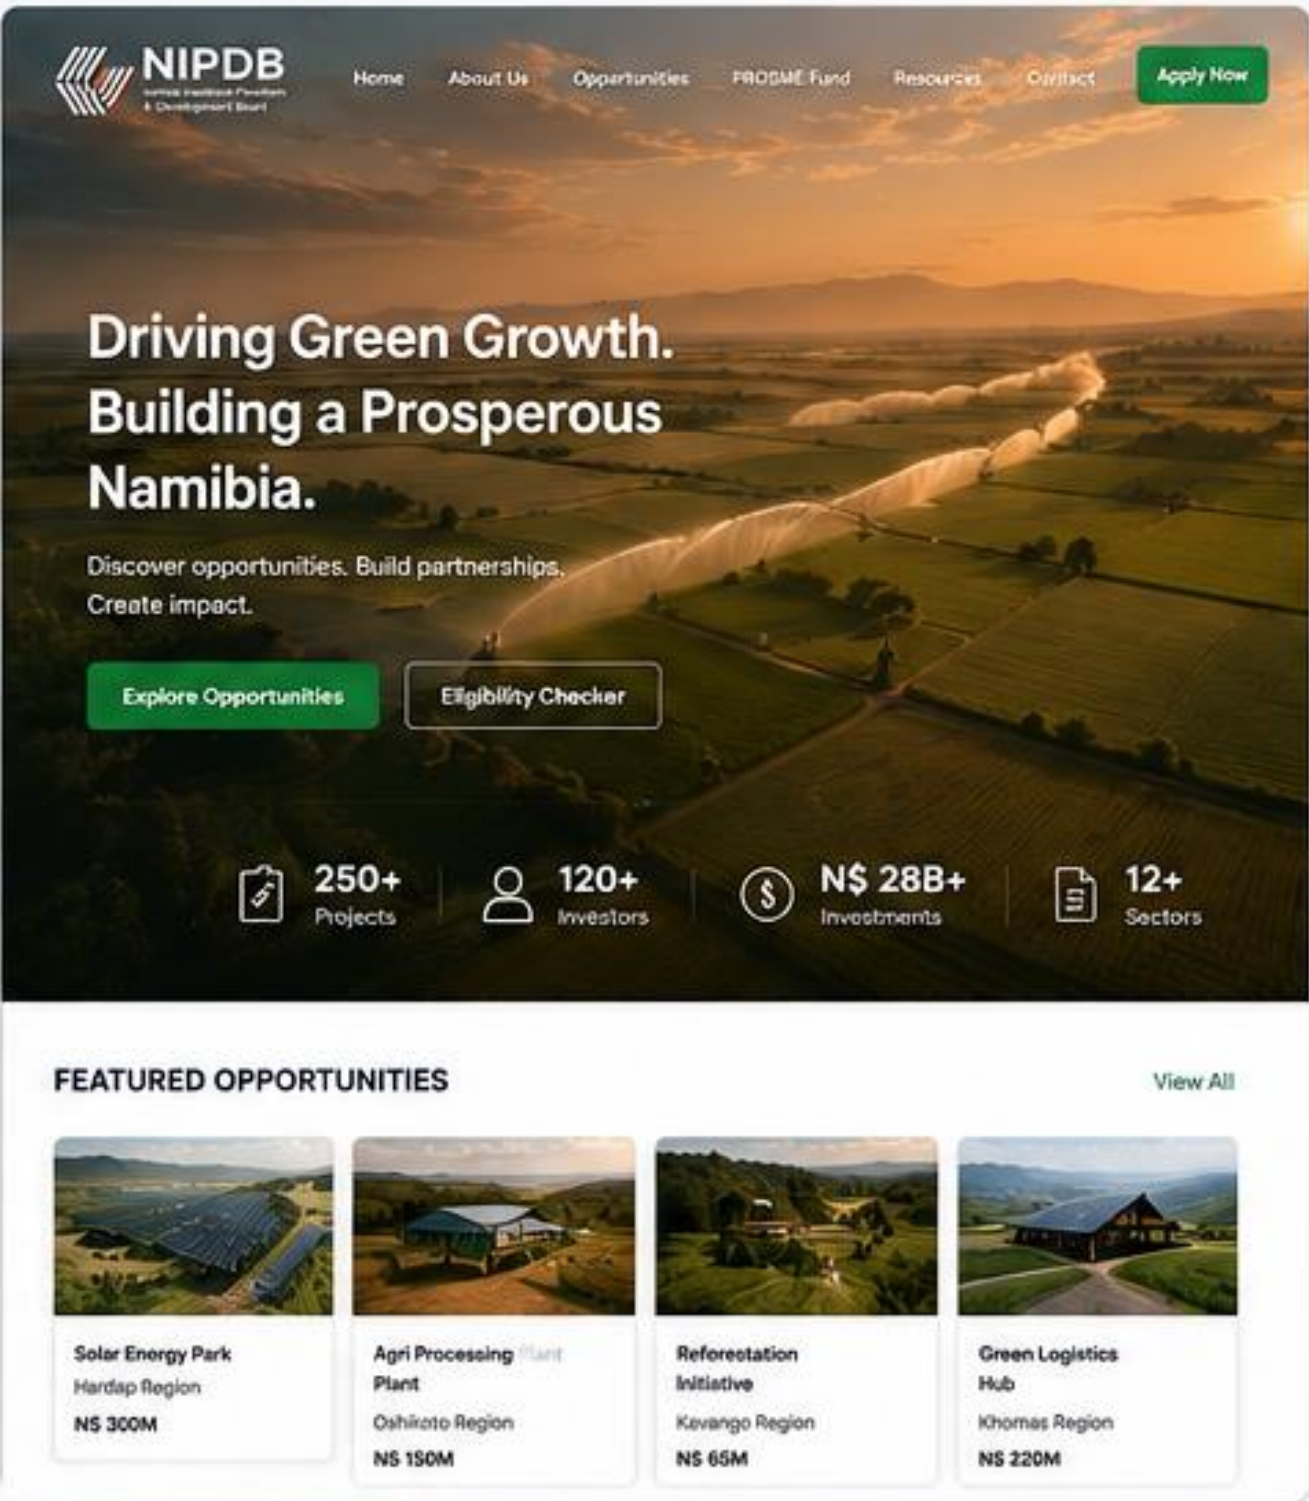

OPTION 1: SIDE NAV – ADMIN STYLE

A modern admin-style layout with a fixed side navigation.

- ✓ Provides easy access to all major sections.
- ✓ Best for users who prefer structure and clear navigation.

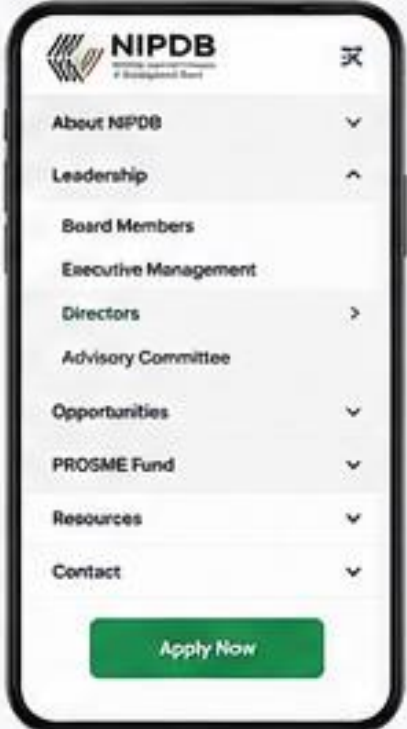

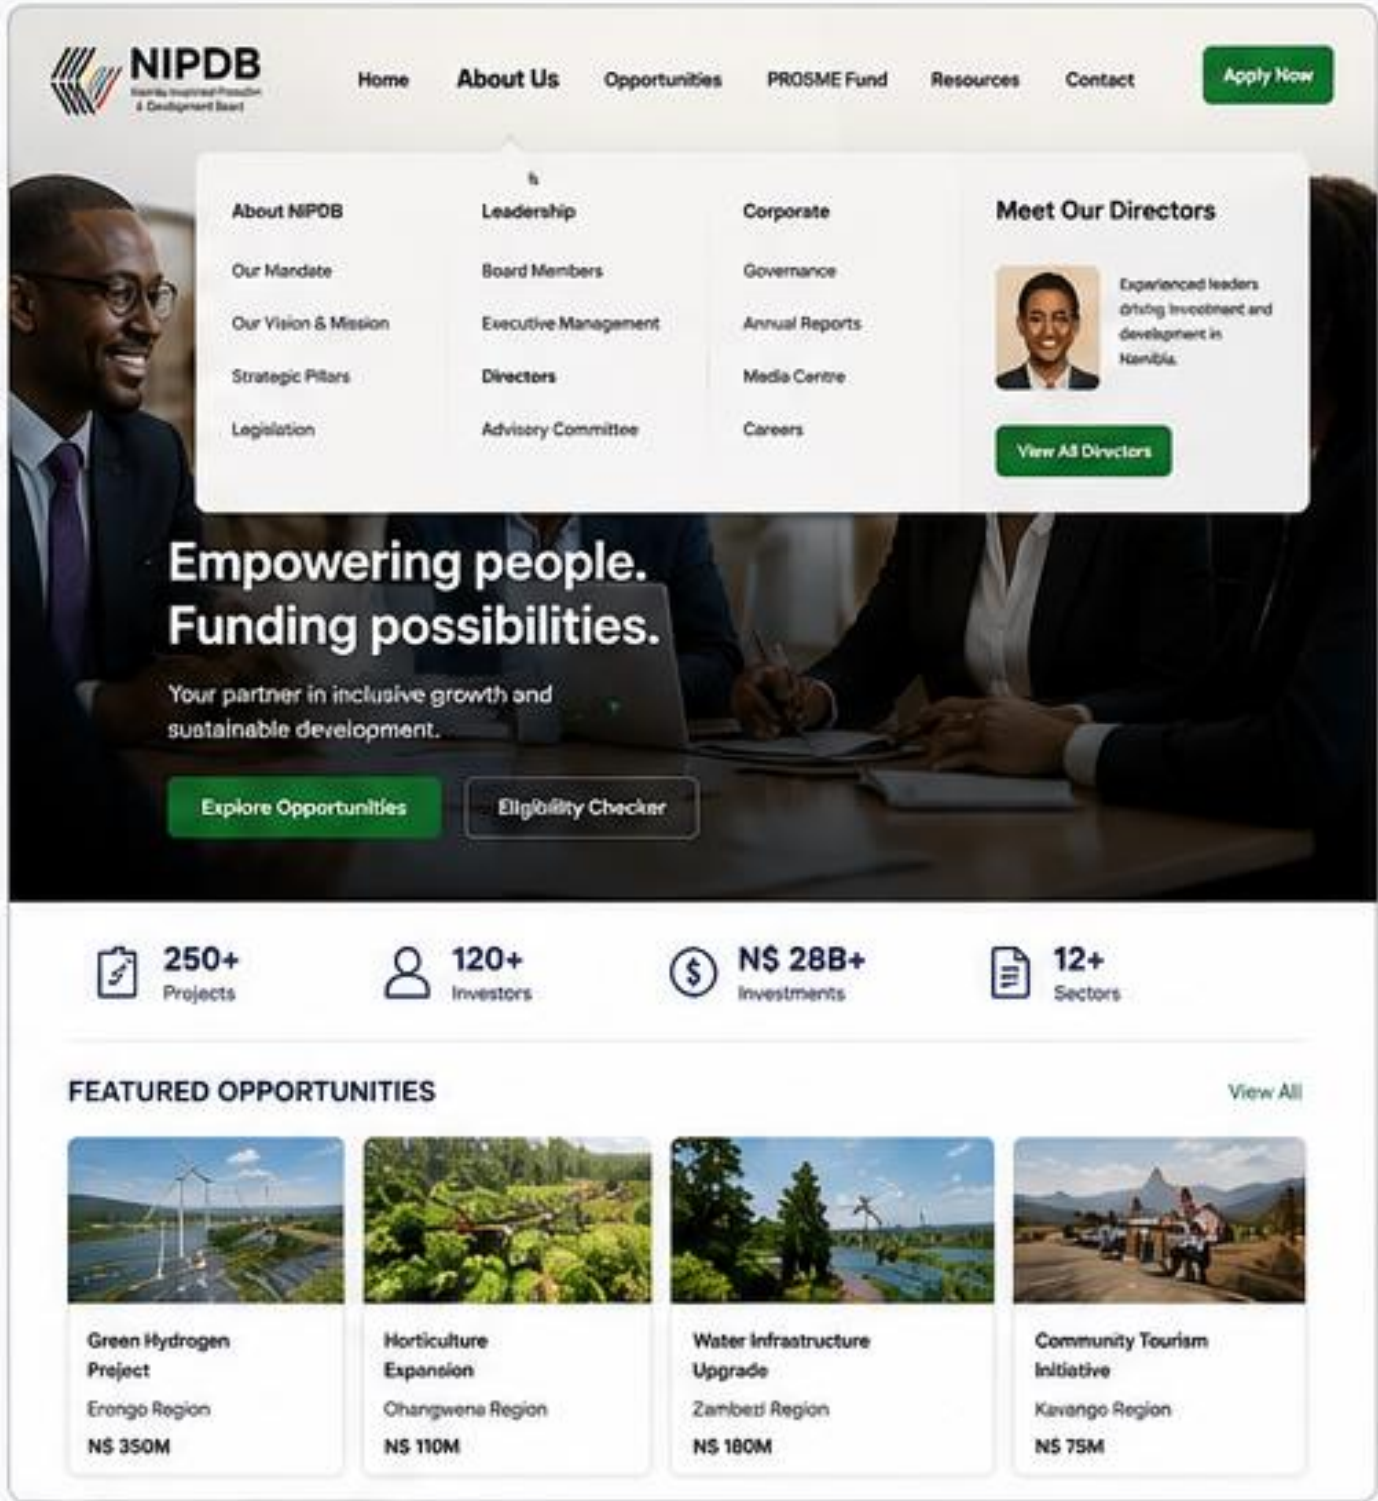

OPTION 2: FULLSCREEN HERO – TOP LINK OVERLAY

A fullscreen hero layout with top navigation over the image.

- ✓ Engaging and visual, ideal for storytelling and impact.
- ✓ Great for highlighting opportunities and national development.

OPTION 3: MEGA MENU – DIRECTOR PROFILES

A modern layout with mega dropdown menus.

- ✓ Allows users to explore many options without leaving the page.
- ✓ Ideal for content-rich platforms and power users.

**STANDARD FEATURES
ACROSS ALL OPTIONS**

Responsive Design
(Desktop, Tablet, Mobile)

AI Chatbot
24/7 Support

Secure & Transparent
Data Protection

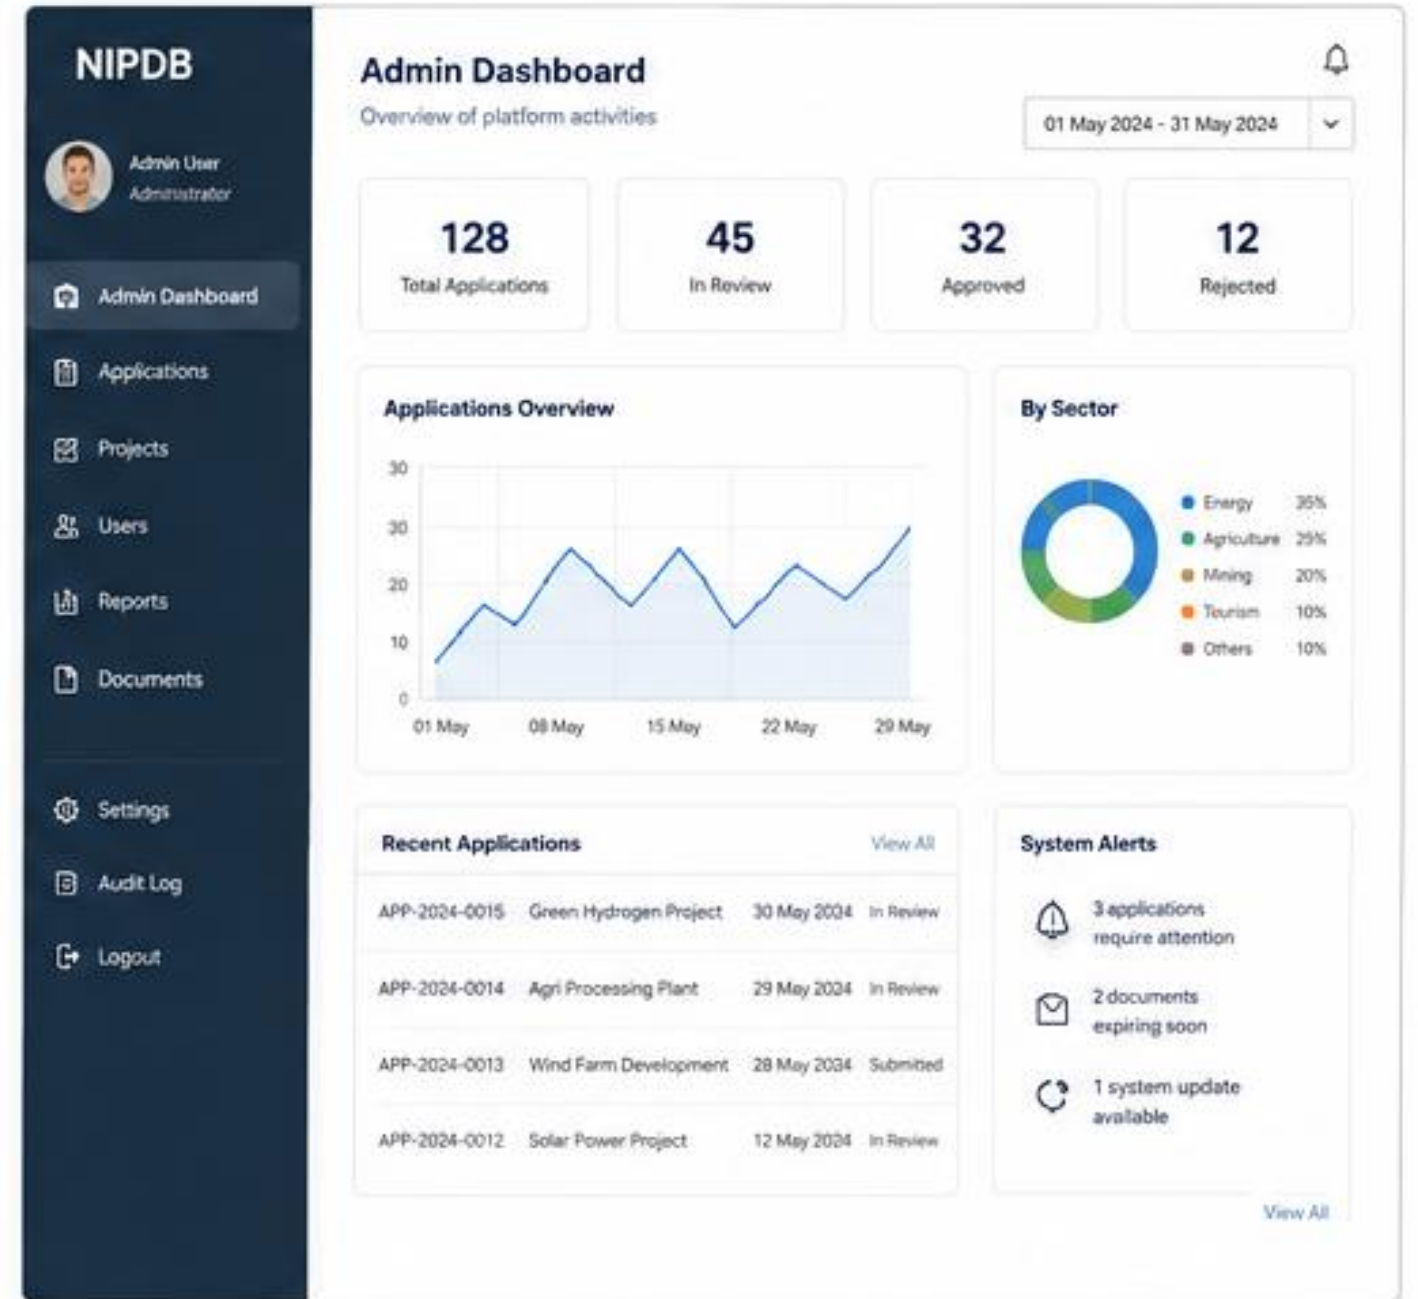

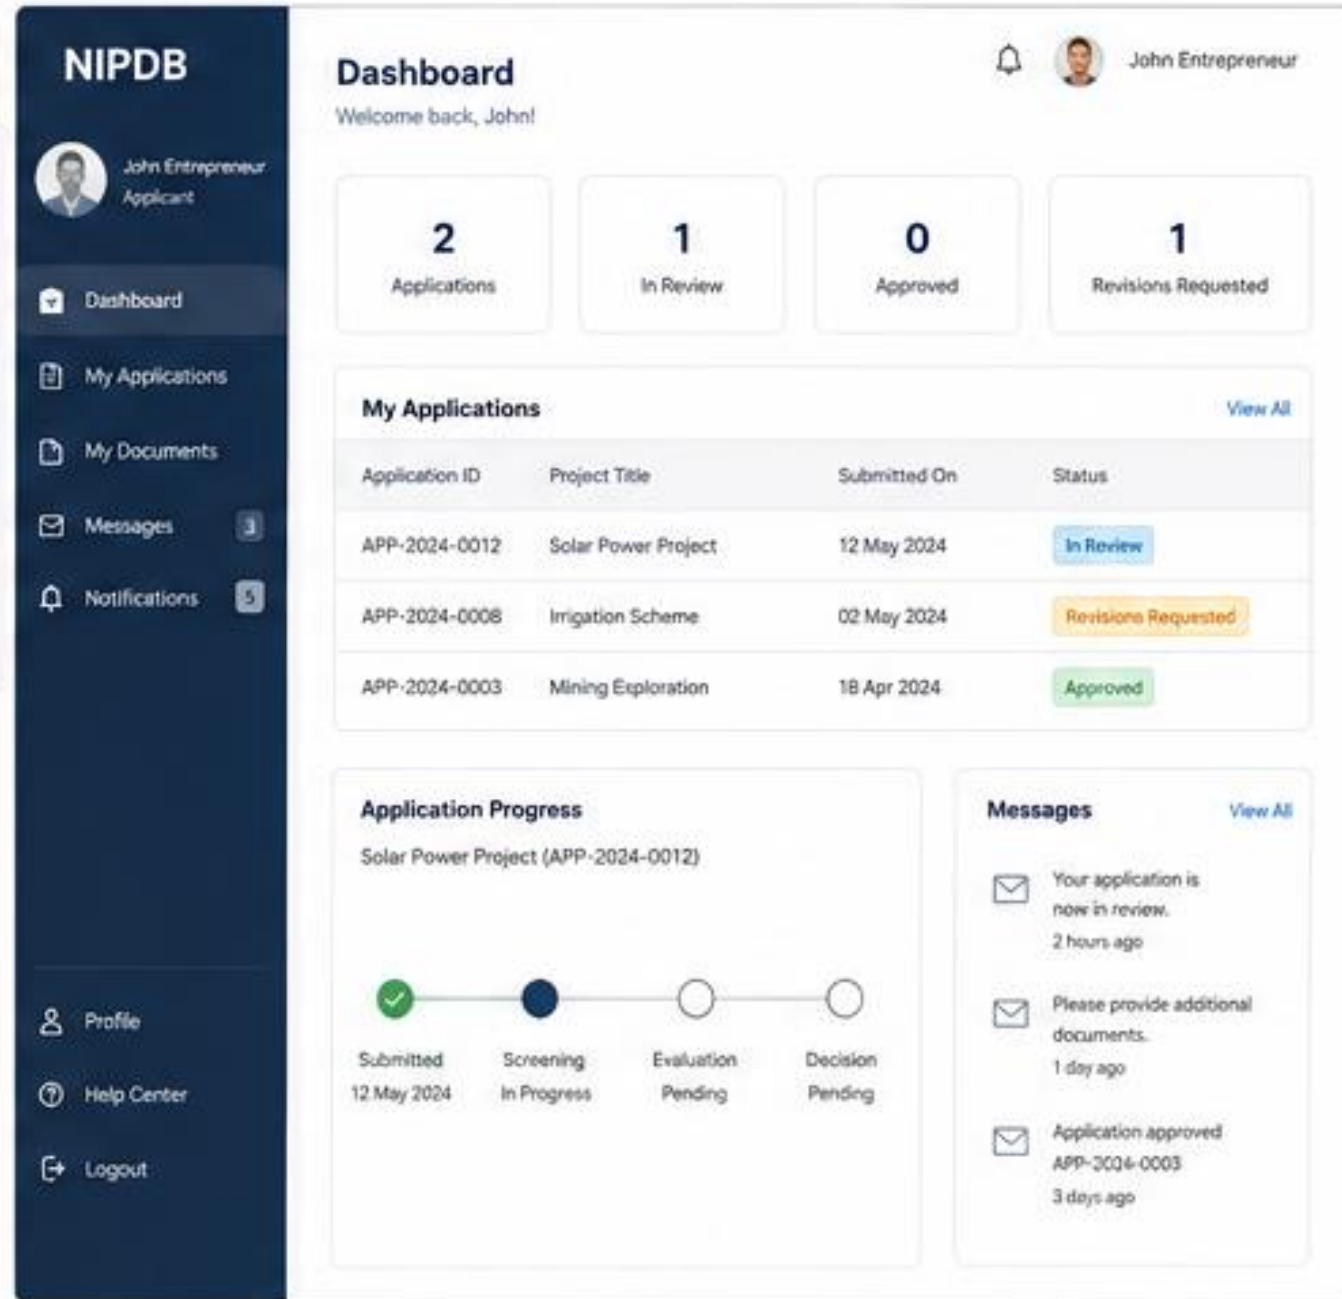

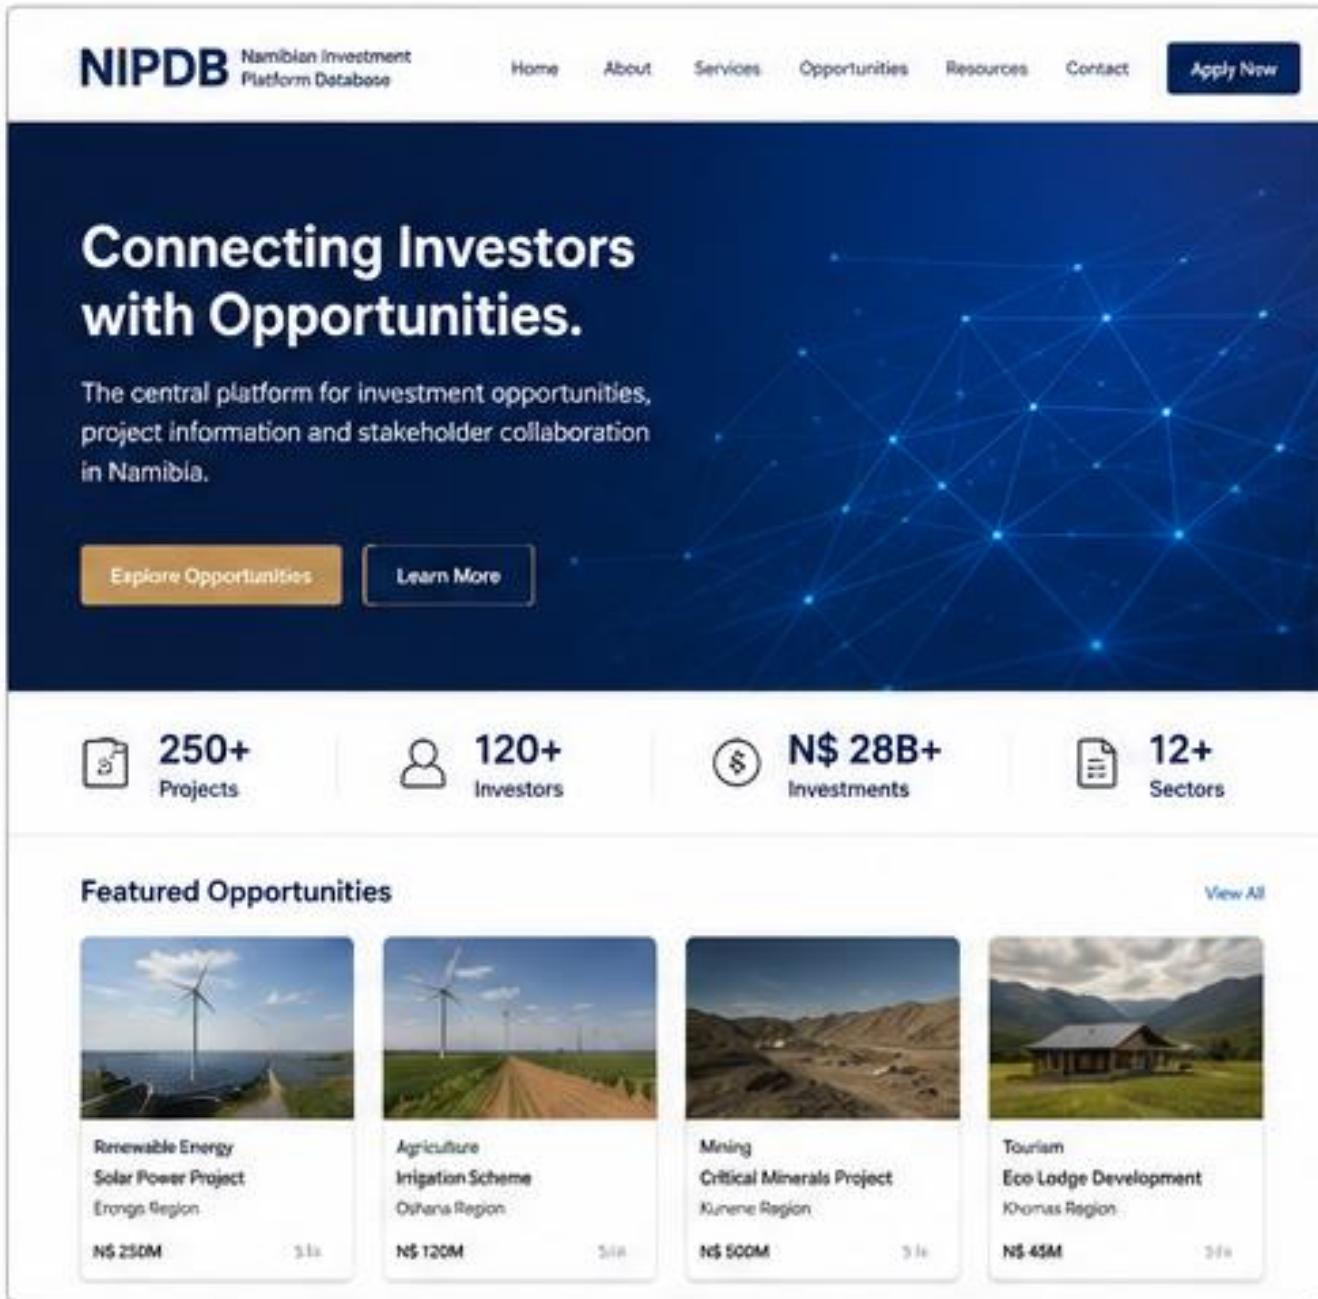

Fast & Accessible
Optimized Performance

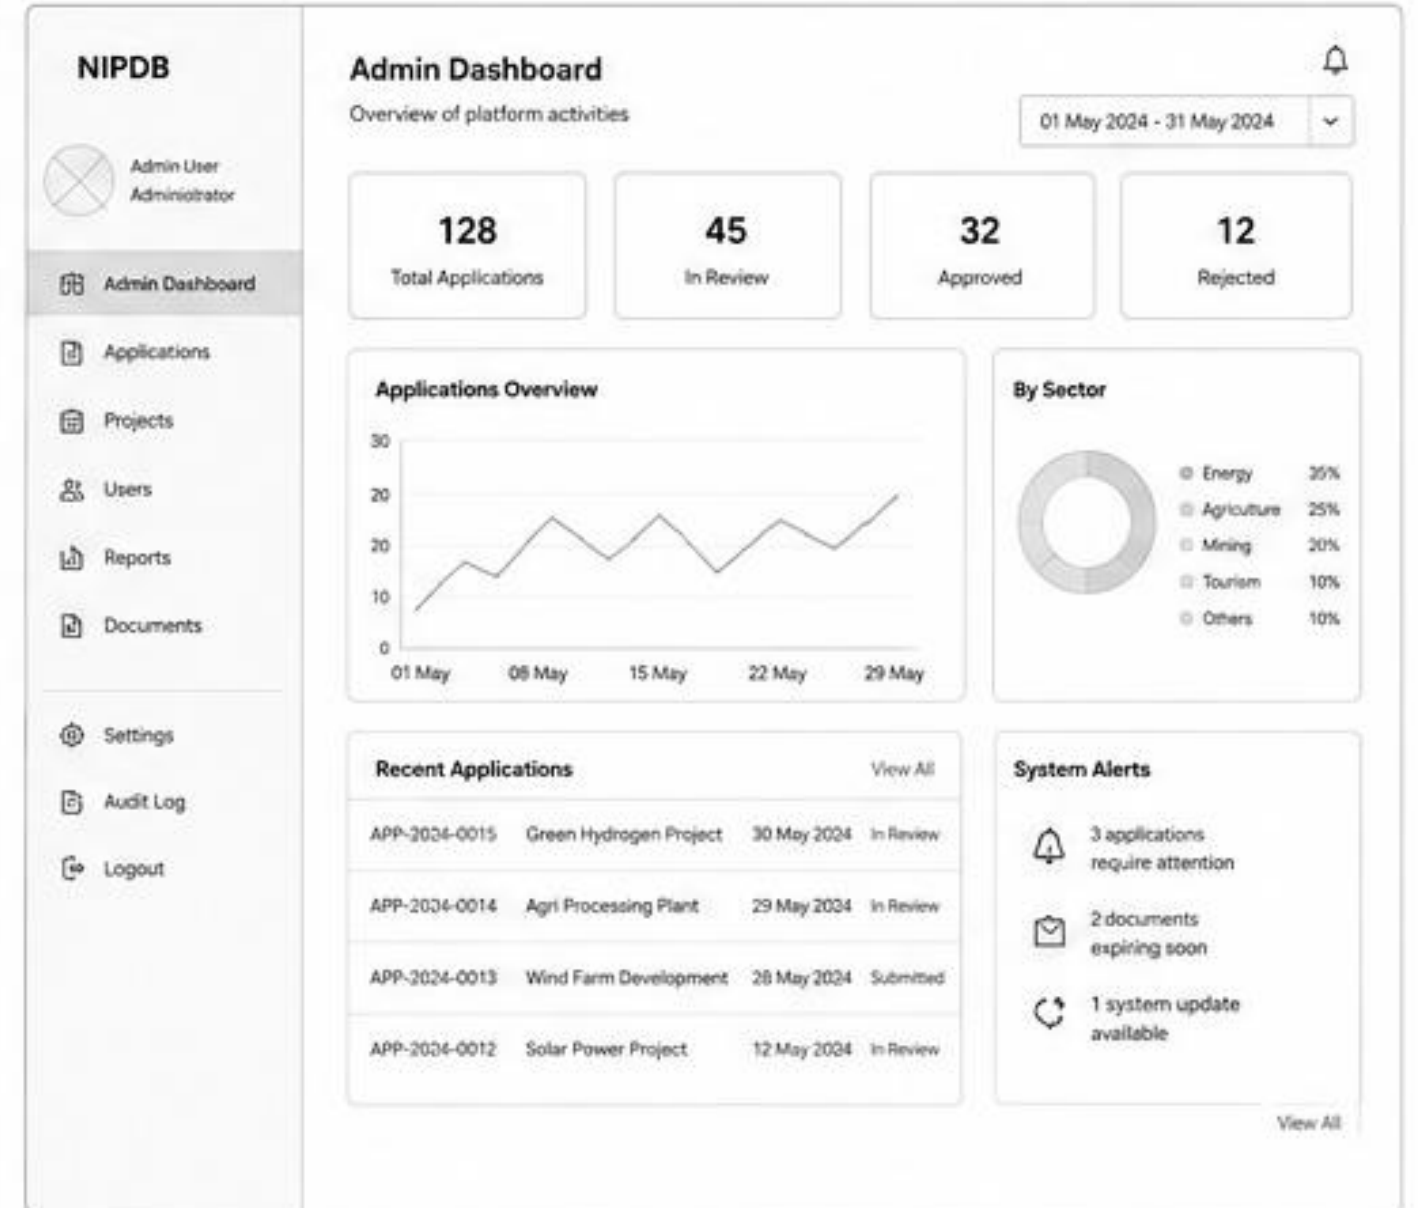

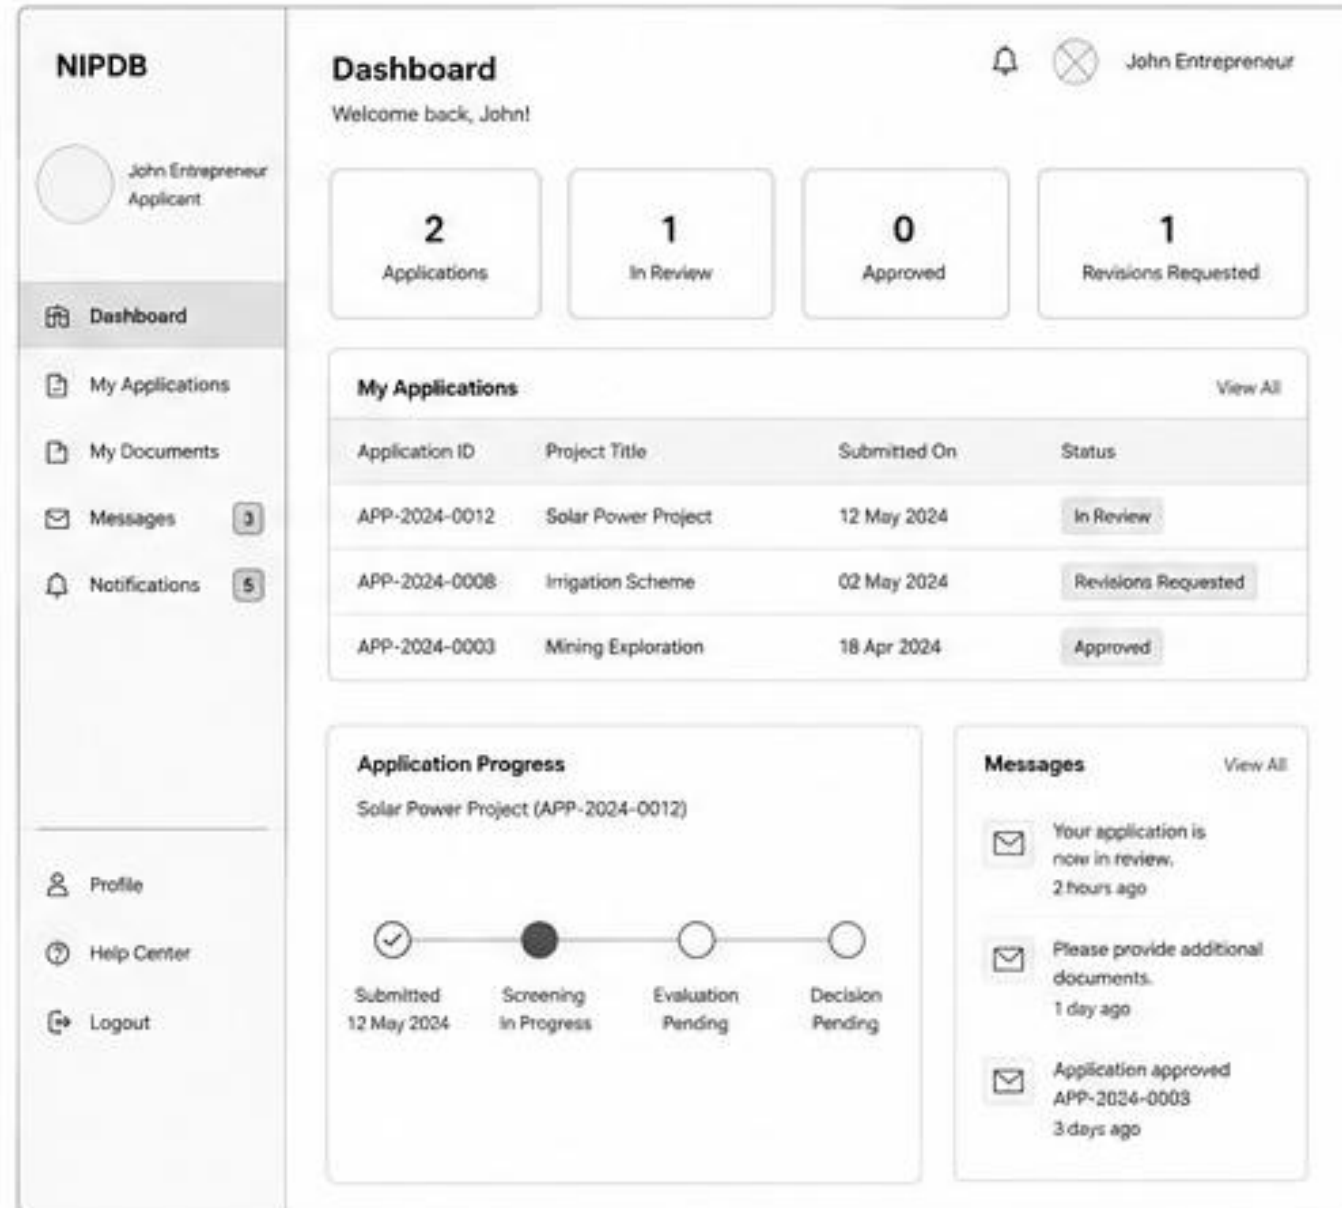

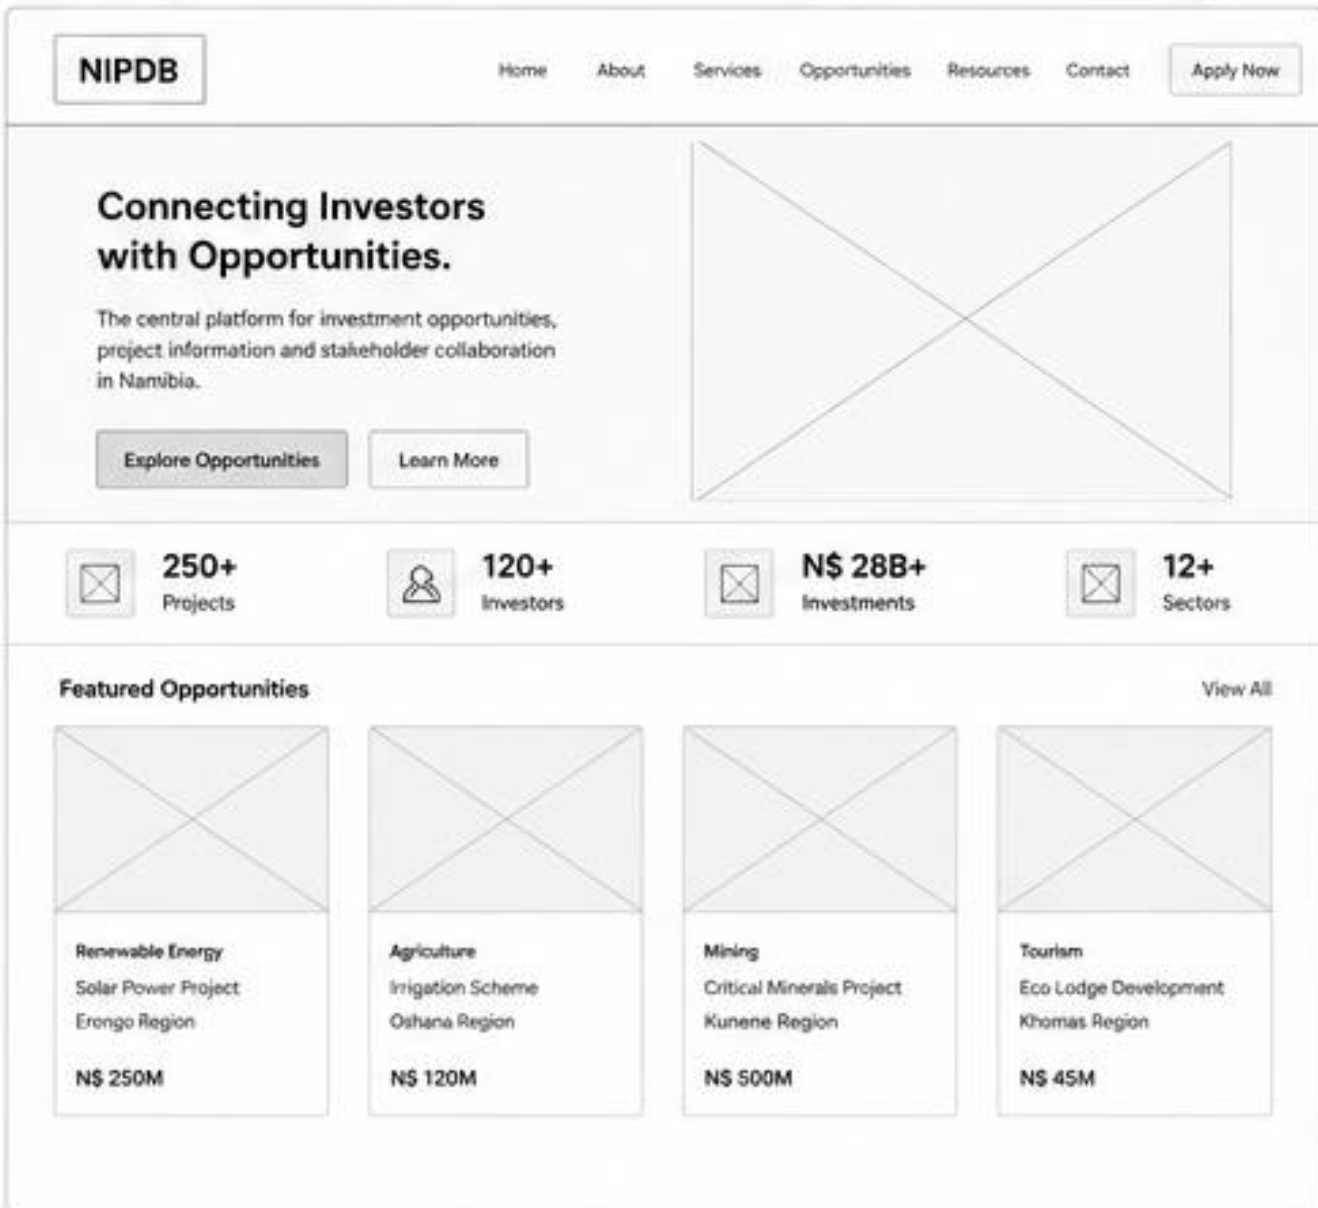

Multilingual Ready
English & Local Languages

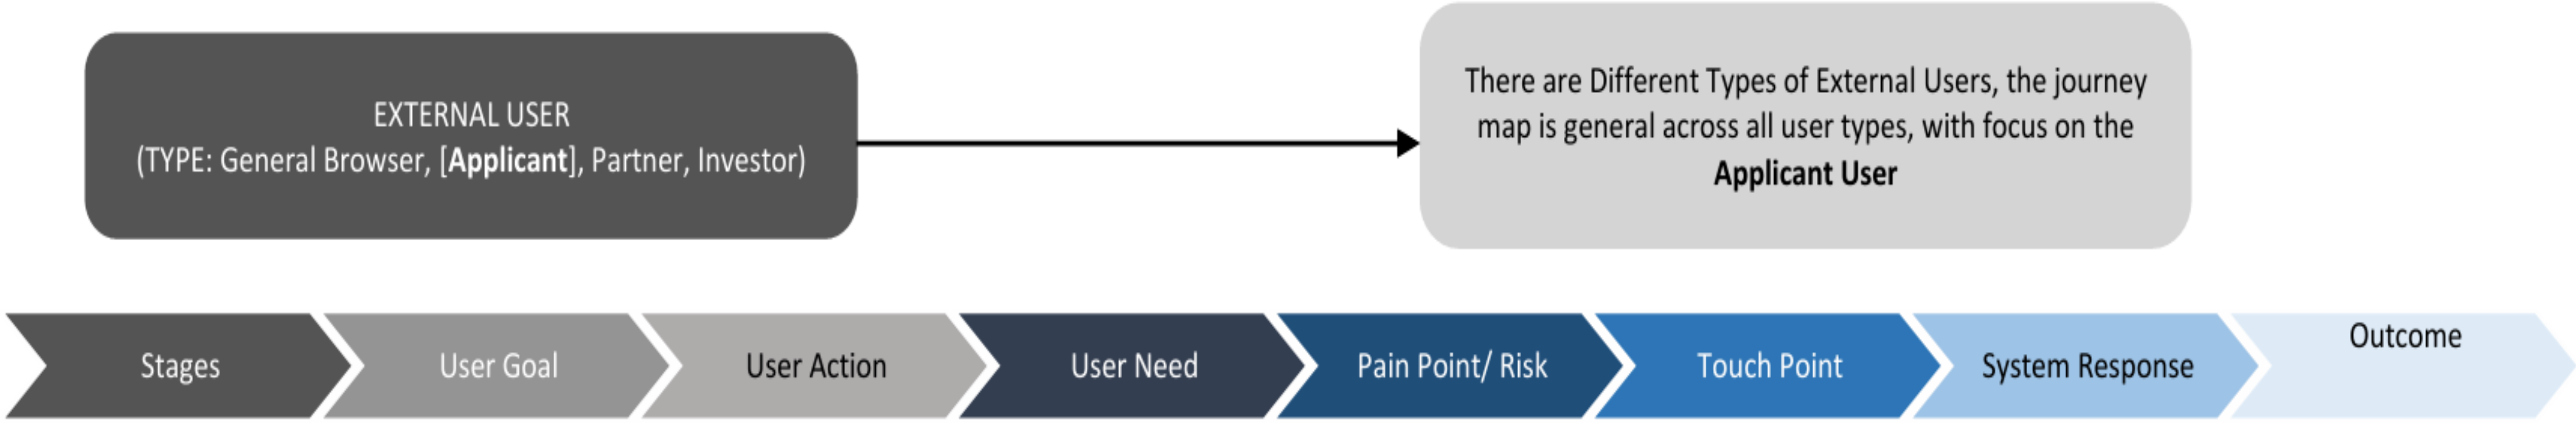

NIPDB PROJECT – VISUAL MOCKUP (HIGH-FIDELITY)

NIPDB PROJECT – WIREFRAME (LOW-FIDELITY)

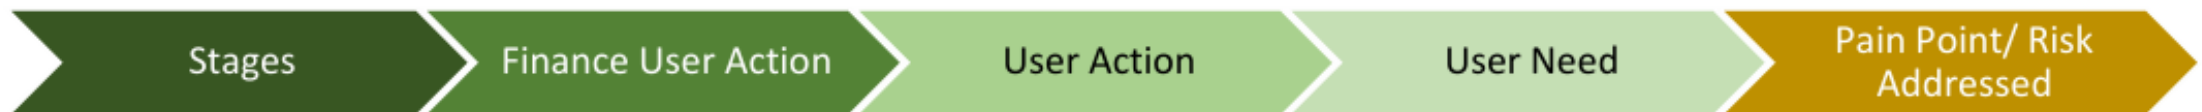

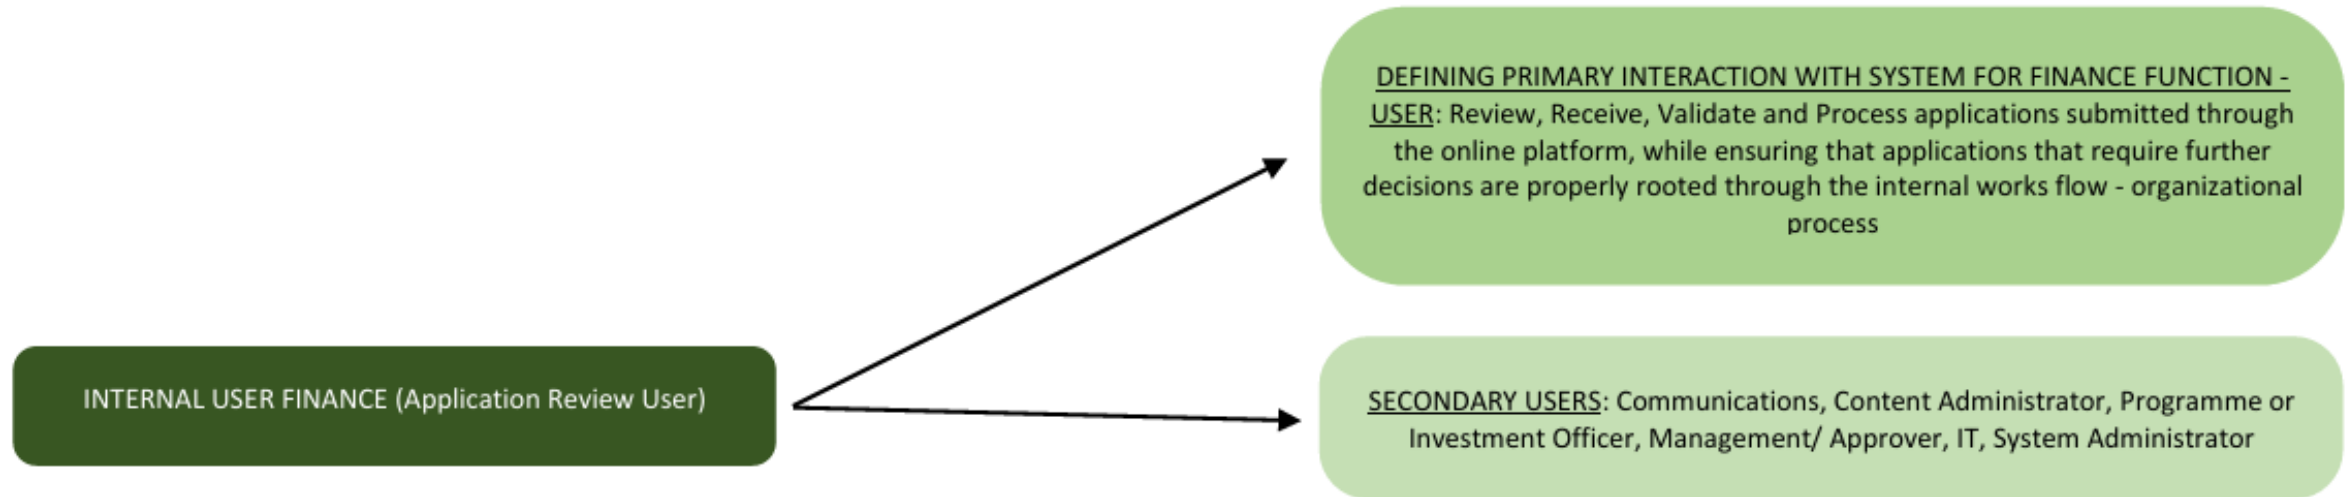

APPLICANT USER JOURNEY MAP

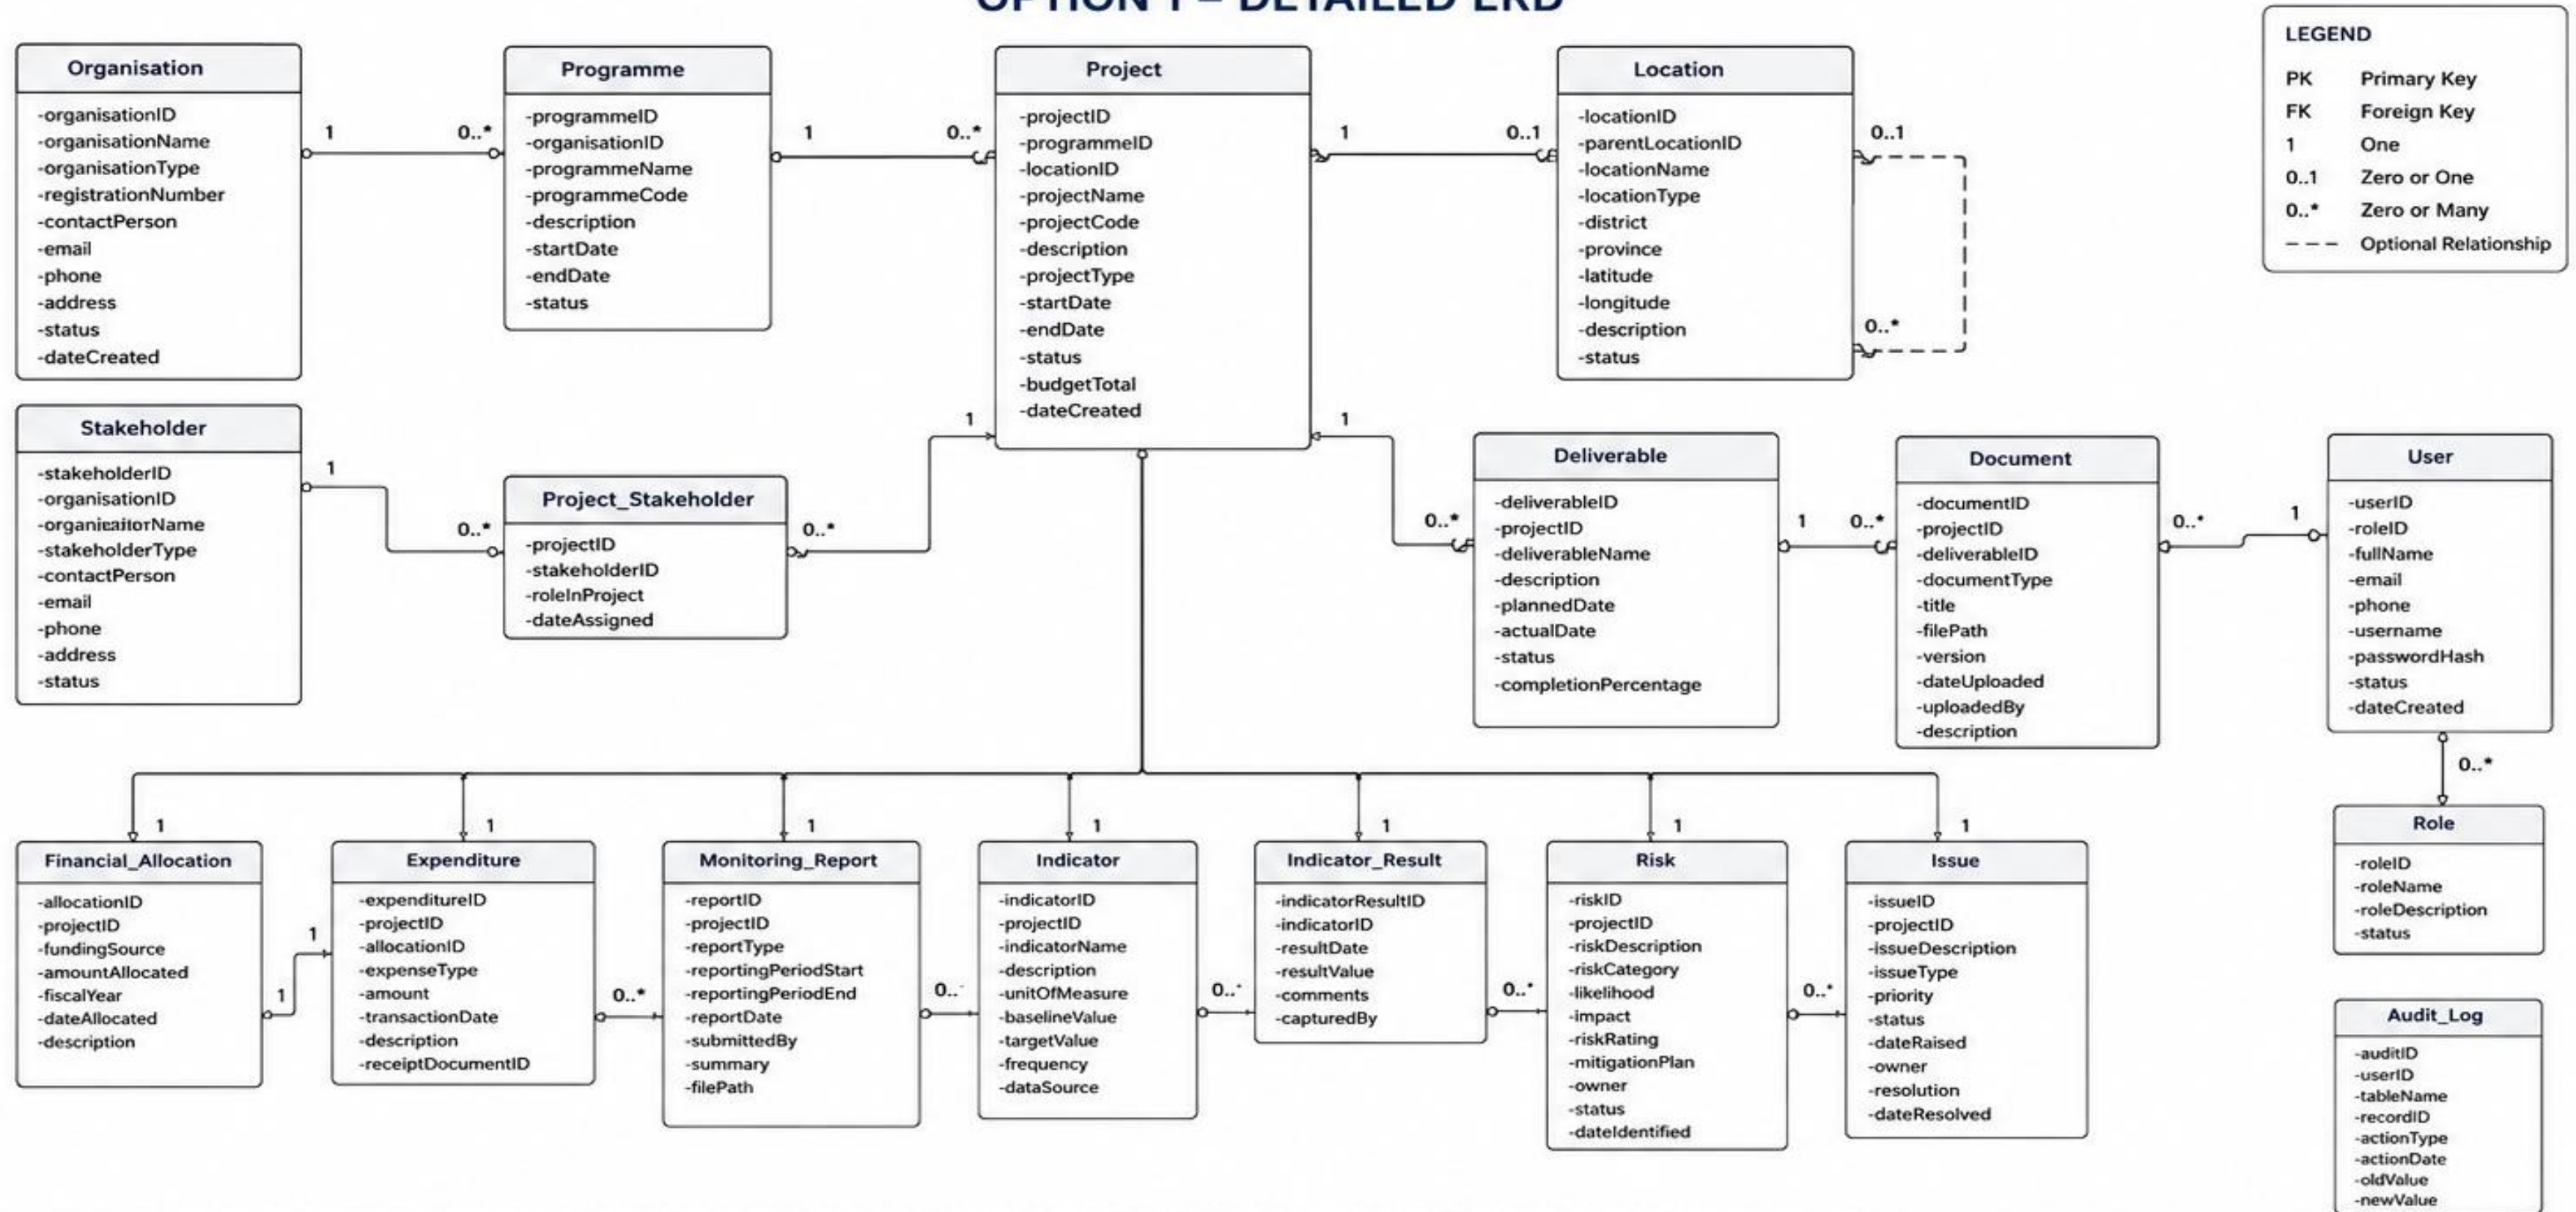

UX	UI							
	Discover	Find Relevant	Searches Website	Easy to Find information	Information difficult to find	Website	Clear navigation/ search	Finds relevant programme
	Explore	Understand Service	Reads Information	Clear Information	Technical/ Unclear Language	Programme Page	Structured Content	Understands Opportunities available
	Evaluate	Determine Suitability	Checks Eligibility	Clear Criteria	Uncertainty about qualification	Eligibility Page/ Checker	Eligibility information	Determines Suitability
	Prepare	Get Ready	Reviews Requirements	Checklist/ Guideline	Missing Documents	Requirements Page/ Available	Checklist/ Download	Application Ready
	Apply	Submit Application	Completes Form	Simple Application Process	Complex/ Lengthy Form	Application Portal	Online Application	Application completed
	Submit	Confirm Submission	Uploads and Submits	Confirmation	Uncertainty	Portal	Confirmation/ Reference	Application Received
	Track	Monitor Progress	Checks Status	Transparency	No Visibility	Dashboard	Status Tracking	Knows Application Status
	Respond	Address Queries	Provides additional Information	Easy Communication	Delays/ Missed requests	Dashboard/ Email	Notifications	Query Resolved
	Outcome	Receive Decision	Views Outcome	Clear Decision on Way Forward	Uncertainty	Dashboard/ Modification	Outcome Notificaiton	Knows next Action

FINANCE USER JOURNEY MAP

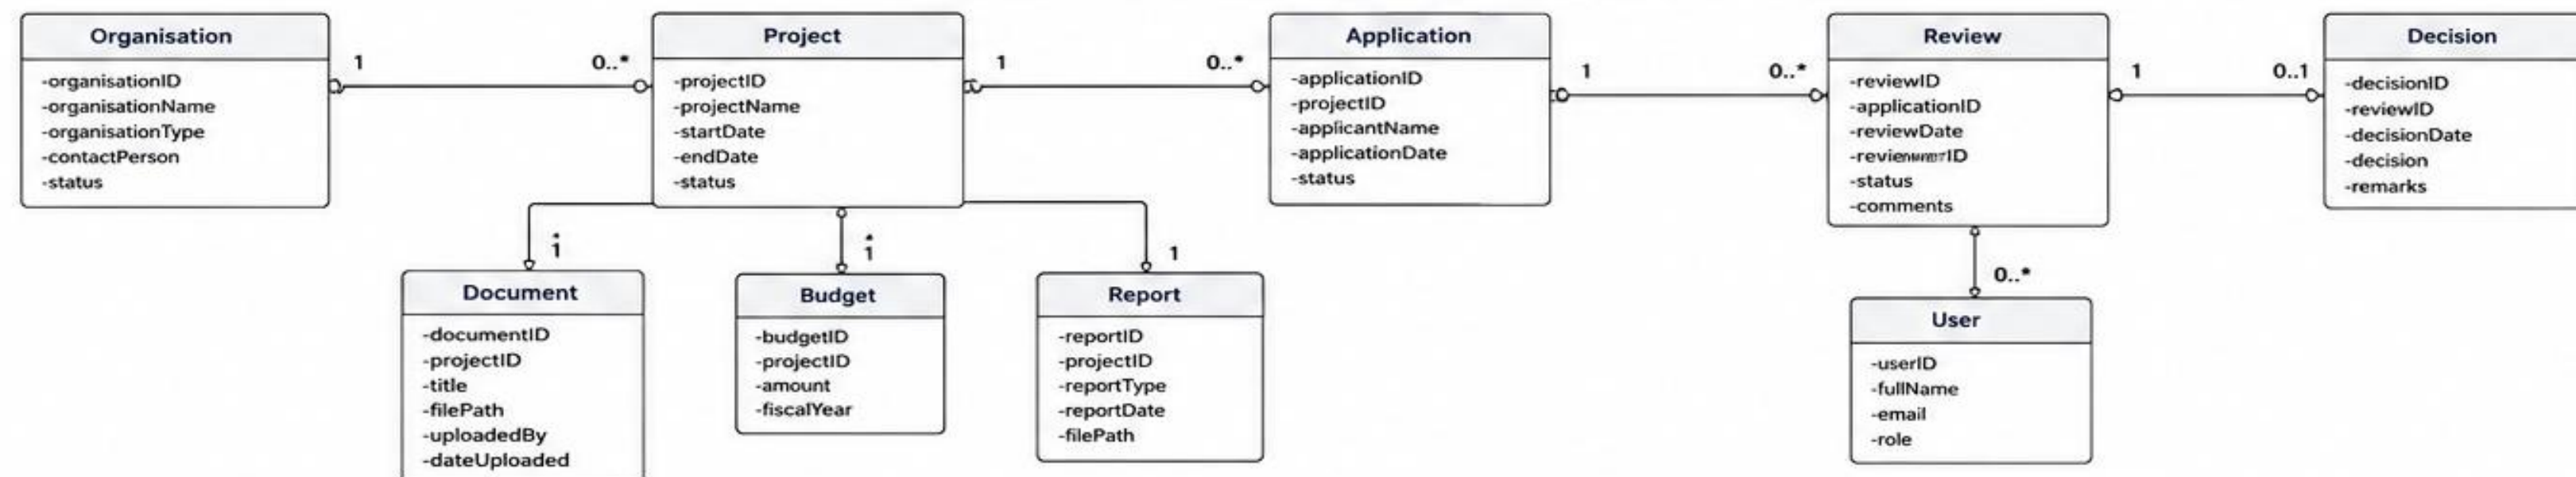

UX	UI				
		A	B	C	D
	1	Access	Logs into internal Platform	Secure Authentication and Role Based Dashboard	IT Maintains user access and security (Profile Management)
	2	Monitor Intake	Checks newly received Applications	Application Dashboard displays new submissions	IT Ensures Platform Availability
	3	Review Application	Opens Applications and Review Applications Information	Applicant Profile, Application form and submitted documents displayed	Programme/ Investment may provide supporting information
	4	Validate Submission	Checks Completeness and Required Documentation	System provides checklist/ validation fields	Applicant may be notified automatically if information is missing
	5	Preliminary Submission	Reviews financial information and relevant eligibility requirements	Assessment Workflow and scoring/ criteria	Programme or technical officers may provide additional assessment
	6	Request Information	Identifies missing or unclear information	System generates information request/ notification	Communications function supports formal communication
	7	Receive Response	Review Additional Information submitted	Application Record Automatically Updated	IT maintains document and notification services
	8	Financial Review	Reviews Financial viability, funding requirements and supporting financial documentation	Finance assessment module/ workflow	Programme, Investment function may assess business or investment aspects
	9	Internal Referral	Routes Application to next appropriate function	Workflow engine assigns application/ status	Programme, Investment, Risk or Management receives task
	10	Review/ Decision	Records recommendation or financial assessment	Approval/ Decision Workflow	Authorized Management or committee reviews where applicable
	11	Communication	Confirms that appropriate outcome is communicated	Automated or controlled notification	Communications function manages approved public/ general communications

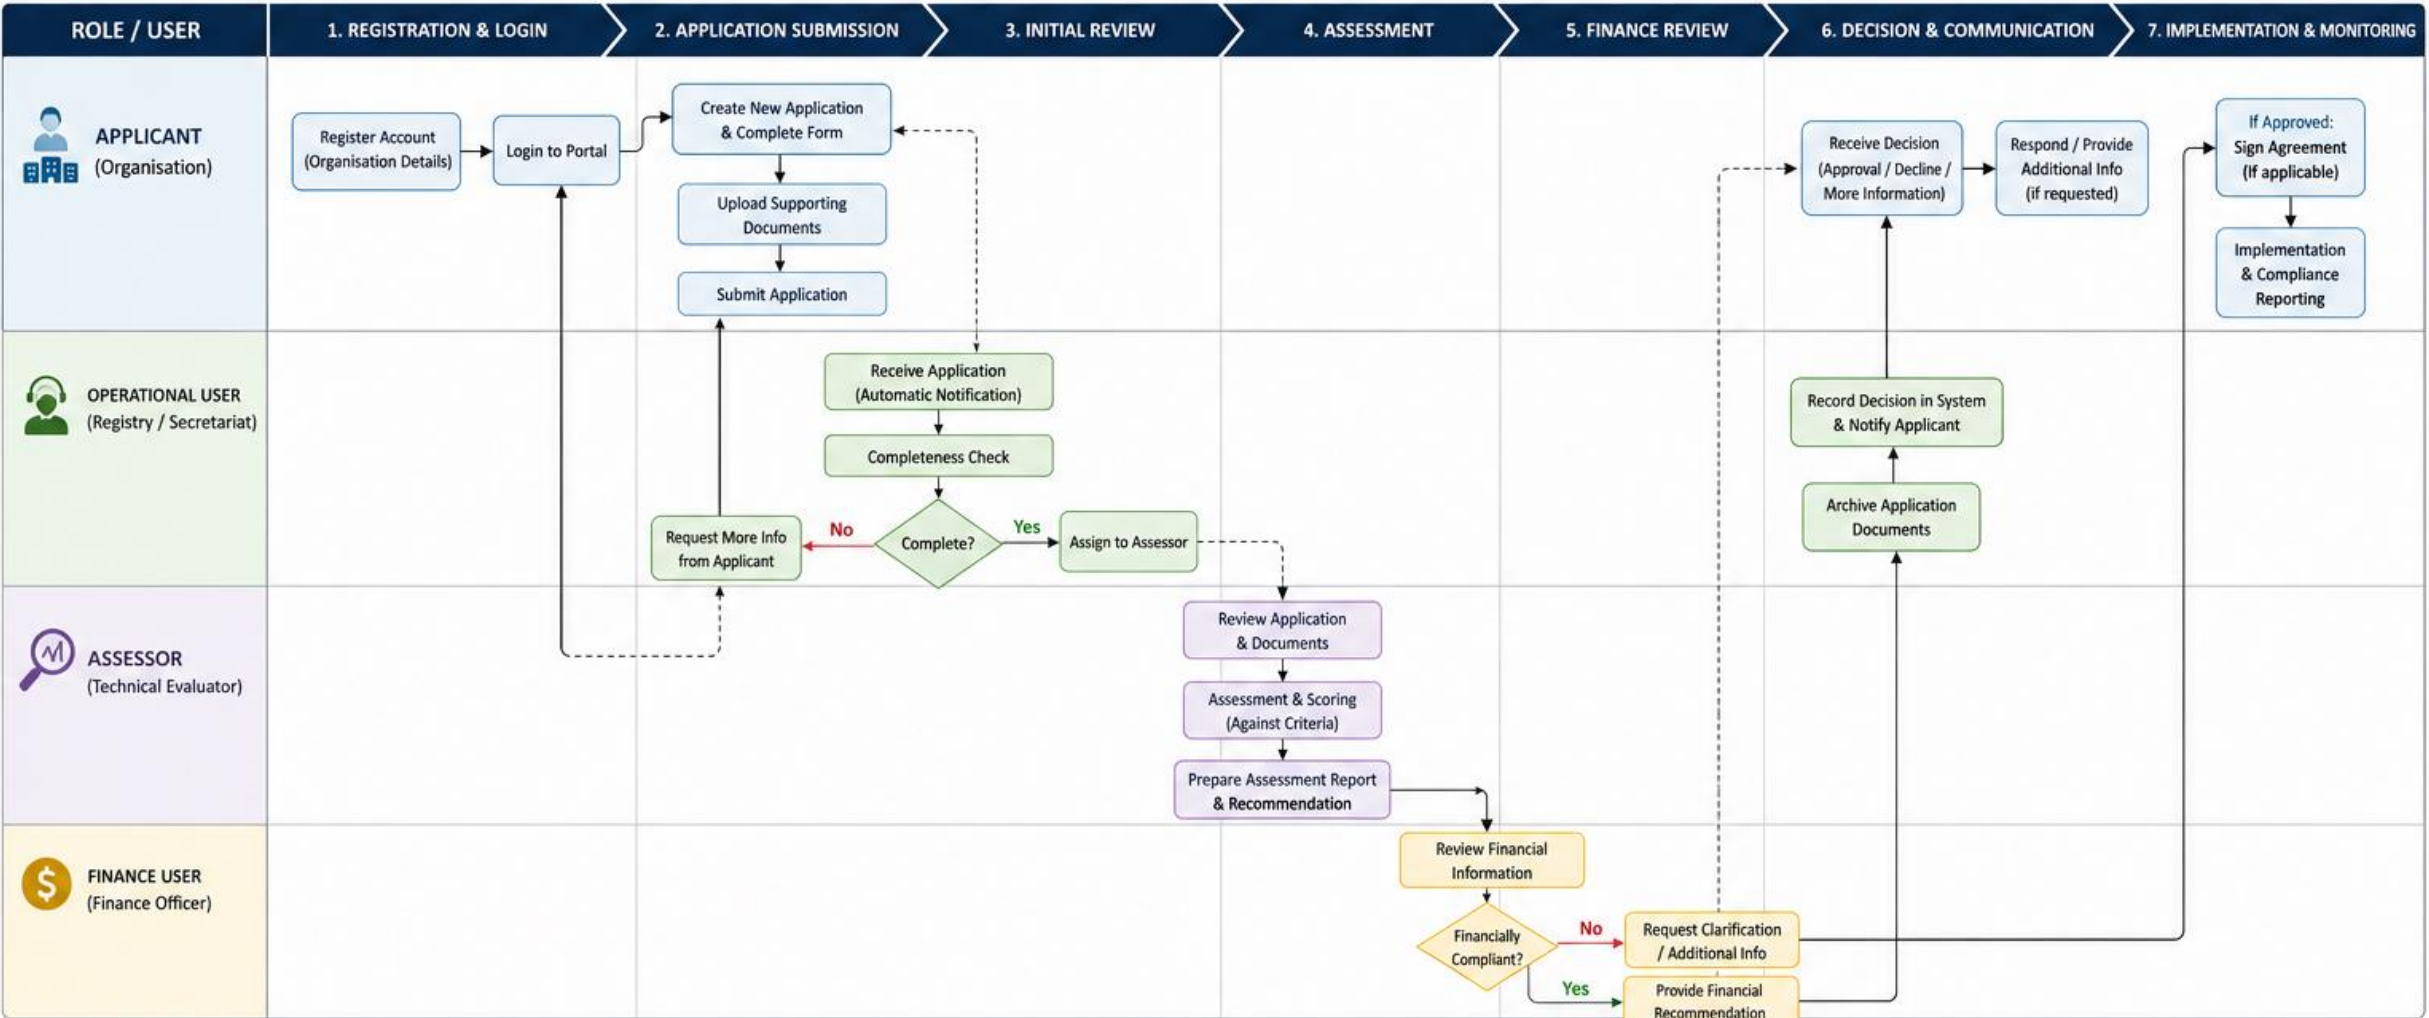

OPTION 1 – DETAILED ERD

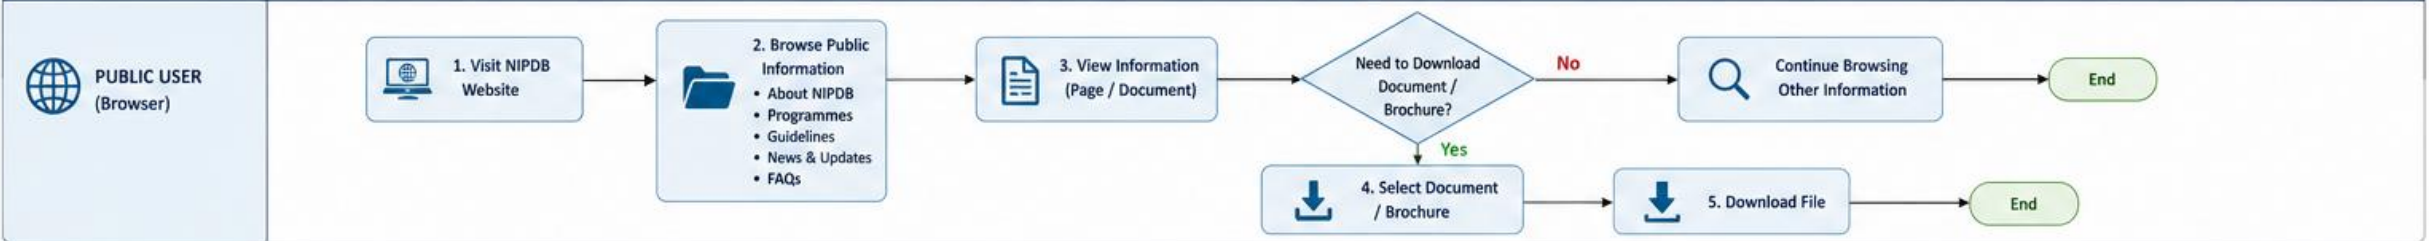

OPTION 2 – SIMPLIFIED ERD (MAIN ENTITIES & FUNCTIONS)

NIPDB – APPLICATION & EVALUATION WORKFLOW (Internal Users)

NIPDB – PUBLIC USER (BROWSER) WORKFLOW – ACCESS PUBLIC INFORMATION & DOWNLOAD DOCUMENTS

Sequence Flow

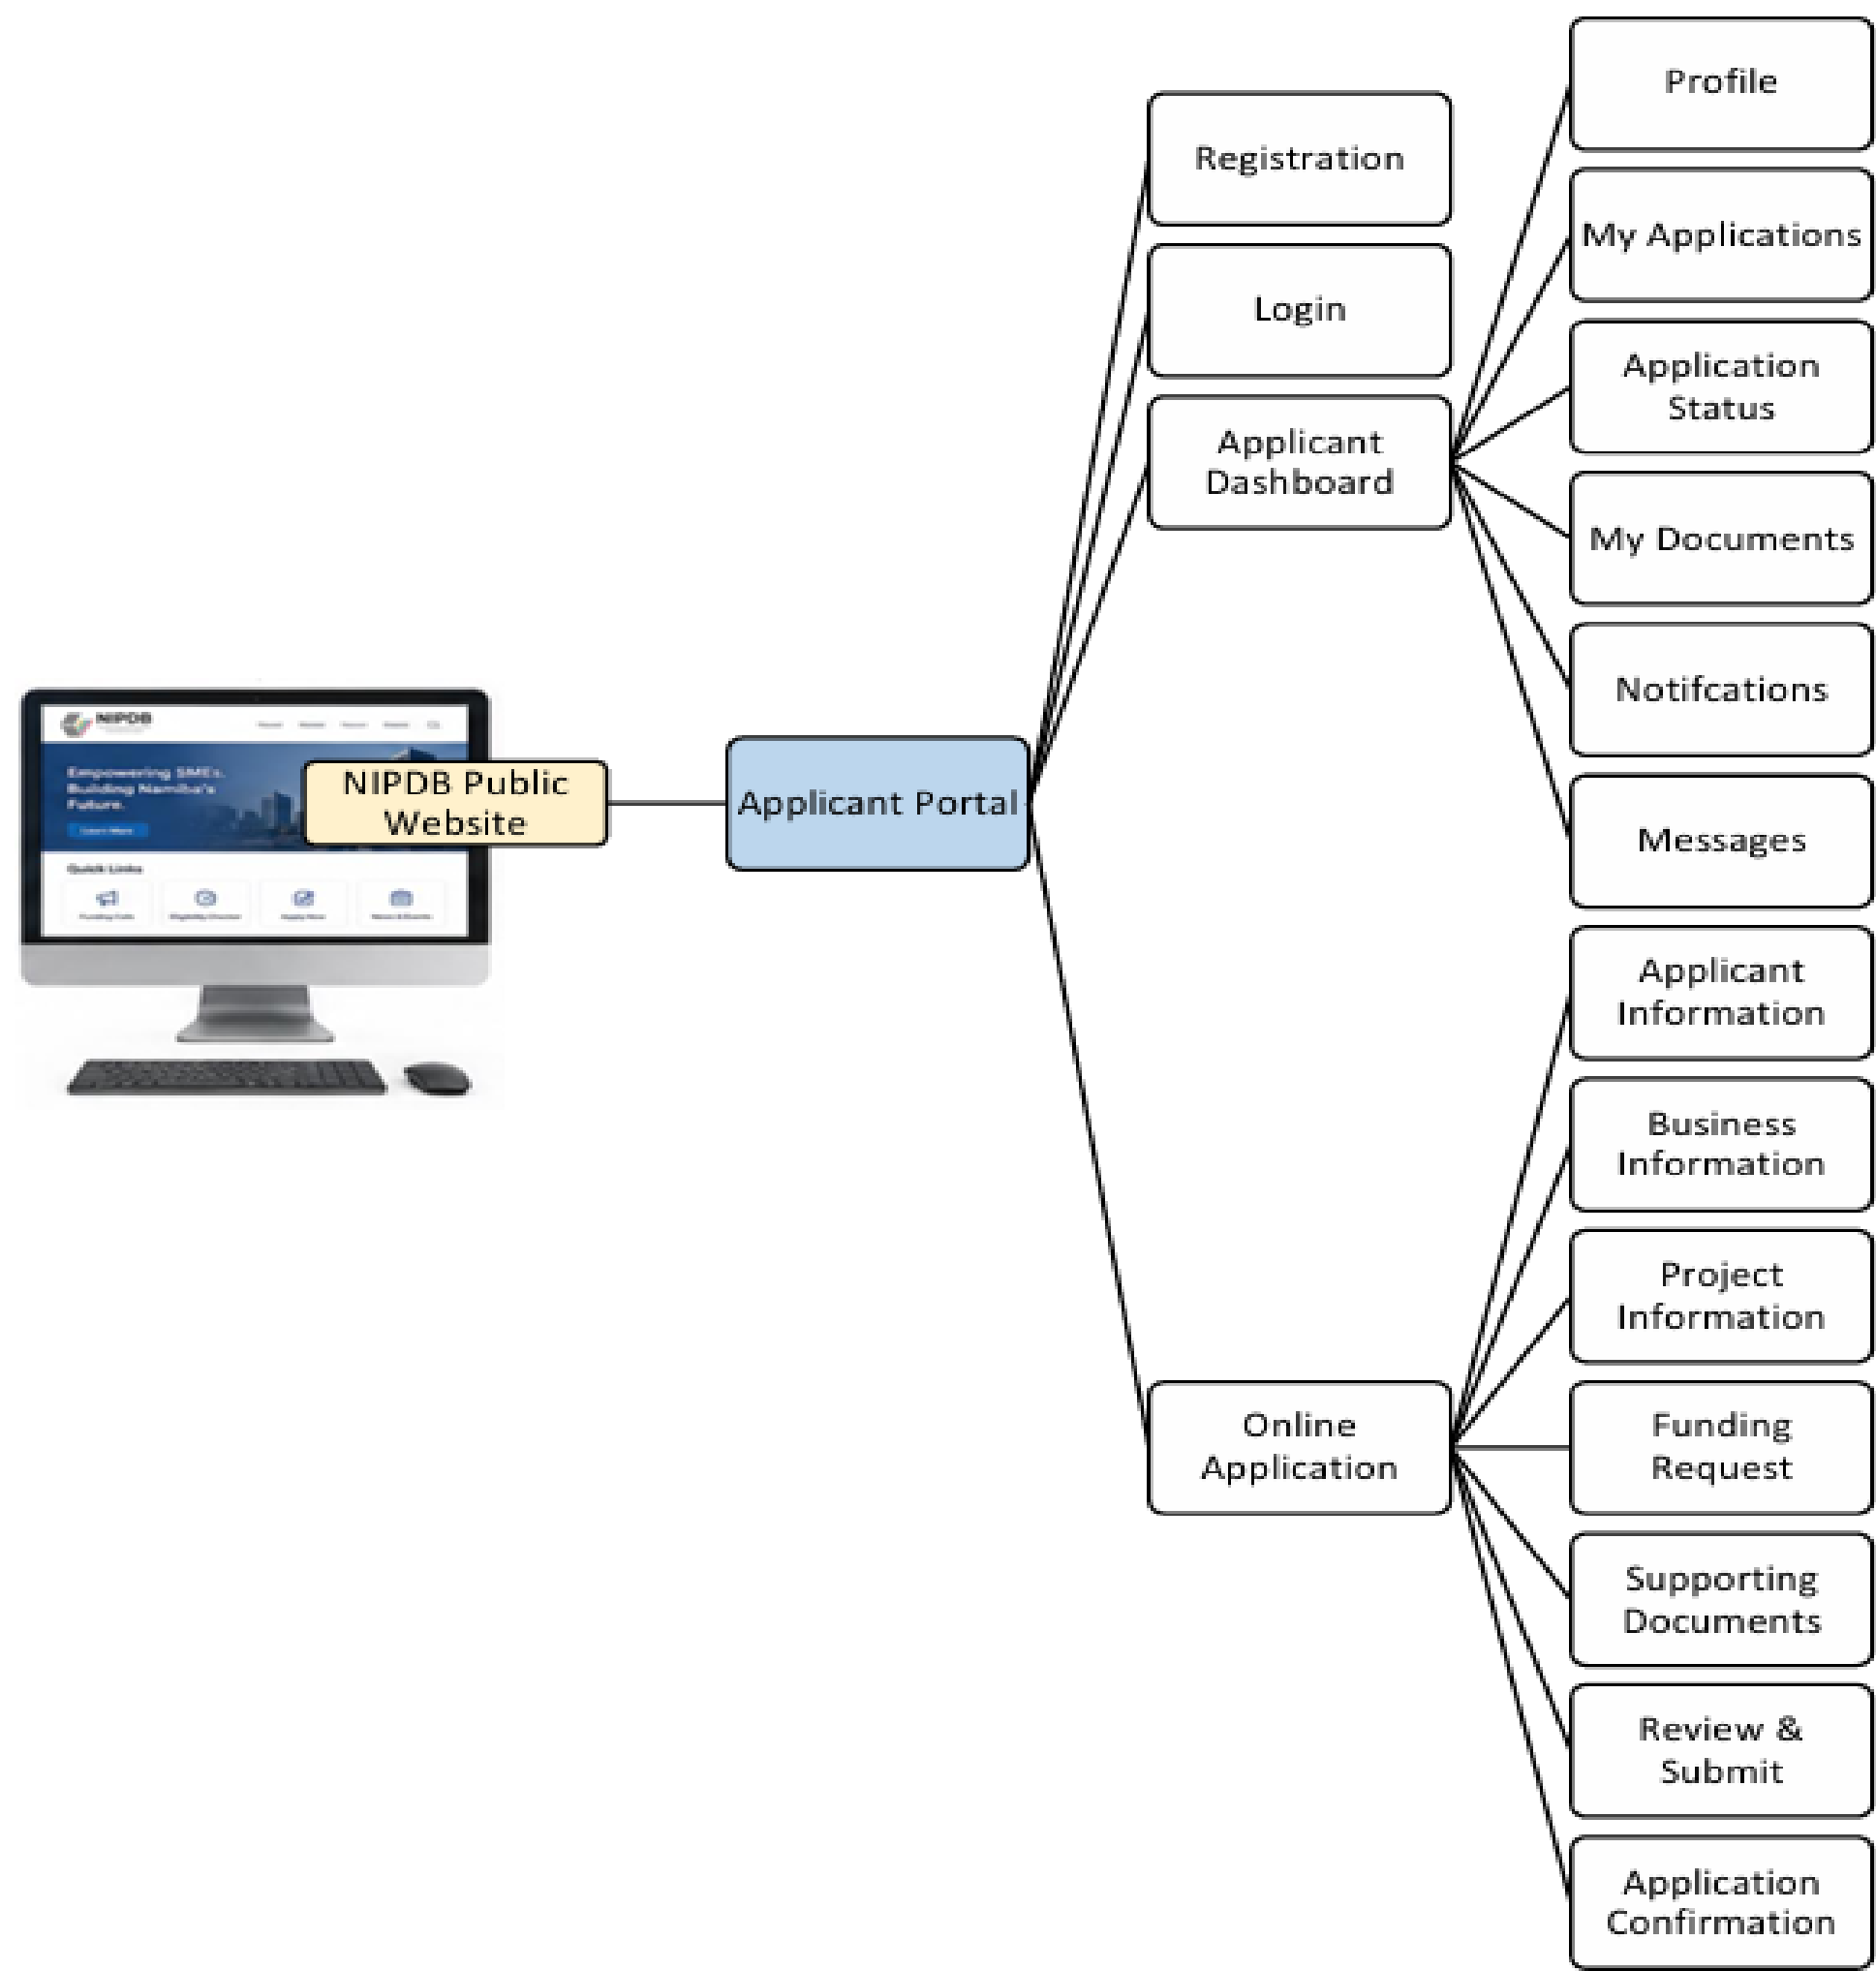

- NOTES**
- 1. All users must authenticate to access the system (except Public Browser Users).
 - 2. Notifications are sent automatically by the system at key stages.
 - 3. All documents and decisions are stored in the central database with audit trail.
 - 4. Roles & permissions control access to modules and data.
 - 5. The workflow can be configured to add more levels or parallel reviews if required.

- KEY SYSTEM FUNCTIONS COVERED**
- ✓ User Registration & Authentication
 - ✓ Application Submission & Document Upload
 - ✓ Application Screening & Completeness Check
 - ✓ Technical Assessment & Scoring
 - ✓ Financial Review & Compliance Check
 - ✓ Decision Recording & Applicant Notification
 - ✓ Document Management & Archiving
 - ✓ Public Information Access & Document Download
